SUMMARY

Computer engineering diploma graduate transitioning to BTech, specializing in UI/UX and Android development. Experienced in crafting intuitive interfaces and building user-friendly mobile applications. Eager to apply technical skills and creativity to contribute to innovative projects.

EXPERIENCE

UI/UX Designer Intern Mar 2025 – Jun 2025
Techrover Solution Gujarat

- Designed wireframes, prototypes, and visual assets for web and mobile applications using Figma
- Collaborated closely with developers for seamless implementation of designs
- Gained hands-on experience in user research, usability testing, and responsive design principles

Software Developer Intern Jul 2024 – Aug 2024
Prodigy Infotech Maharashtra

- Contributed to project development by writing clean, efficient Java code within a cross-functional Agile team
- Gained hands-on experience across the full SDLC including debugging, performance optimization, and version control

SKILLS

UI/UX Design	Figma	Android	Web Dev (HTML, CSS)
Java	Data Analysis	QA Testing	Blockchain

CERTIFICATIONS & ACHIEVEMENTS

- UI-UX by Coursera - UX by Accenture	- Google Cloud Career Launchpad 2x Kerala Blockchain Academy	5x Coursera - AWS Cloud Practitioner Essentials	- Hackathon – Gujarat Knowledge Society - Runner Up – Counter Strike College Event
---	--	---	--

EDUCATION

BTech – Information Technology Gujarat
Charusat University Current Pursuing
Diploma in Computer Engineering Gujarat
Gujarat Technical University (CGPA: 7.21) Jun 2020 – Jul 2023

PROJECTS

Biller
Offline billing app for small business owners with local mobile data storage.

- Designed intuitive UI/UX screens enabling seamless bill creation and local data management
- Contributed to QA by identifying and reporting critical bugs including OTP generation failures and product list retrieval issues

Carz
Service station slot booking website allowing users to book nearby stations easily.

- Developed front-end design and conducted QA testing for the platform
- Identified and reported critical bugs such as OTP generation failures and admin panel provider list display issues

BrightFix
Personal project – smart and efficient digital solutions platform.

- Handled end-to-end UI/UX design and testing, creating intuitive user interfaces
- Ensured smooth user experience through thorough usability testing

Digital Signage
Personal project – modern digital screen communication solution displaying dynamic content.

- Worked on UI/UX design and testing to enhance visual engagement
- Ensured usability and performance through structured testing workflows
